CS8191 - Cloud Computing

Topic	Business benefits involved in cloud architecture
Overview of the Topic	1. Cloud architecture provide user to build large scale system with full hardware, machines, routers, backup and other components. So, it reduces the startup cost of the business. 2. Just-in-time Infrastructure: It is very important to scale the infrastructure as the demand rises. This can be done by taking cloud architecture and developing the application in the cloud with dynamic capacity management.
Teaching Method	Assignment given on the topic
Proof for the activity	**Click here**
Feedback from the students about the activity and Knowledge gained	Students learnt the basics of cloud computing
Outcome of the activity	Students are able to differentiate business logic architecture for cloud computing
