

## 19CS406 – Computer Networks

<b>Topic</b>	Details of Physical LAN connection
<b>Overview of the Topic</b>	<ul style="list-style-type: none"><li>• The main objective is to provide the students to learn different transmission media.</li><li>• Transmission media is a communication channel that carries the information from the sender to the receiver.</li><li>• The transmission mode defines the direction of signal flow between two connected devices.</li></ul>
<b>Teaching Method</b>	Demo Videos
<b>Proof for the activity</b>	Click Here for video->  <b>YouTube</b>
<b>Feedback from the students about the activity and Knowledge gained</b>	Students got the knowledge about the data transmission which sends data bits one after another over the channel.
<b>Outcome of the activity</b>	Students are able to understand the designing of different transmission media to perform different application
