19EE302- EMBEDDED PROGRAMMING FOR ELECTRICAL ENGINEERS

Topic:

Driver circuit

Overview of the Topic

A driver is a circuit or component used to control another circuit or component, such as a high-power transistor, liquid crystal display (LCD), stepper motors, and numerous others.

Teaching Method

Video Lecture

Proof for the activity

https://youtu.be/NKr_l9PxqbU

Feedback from the students about the activity and Knowledge gained

Students got the knowledge about the various types of driver circuit..

Outcome of the activity

Students are able to select the driver circuit based on the application.
