

1. Topic- Staircase wiring

2. Overview of the topic- Staircase wiring is a common multi-way switching or two-way light switching connection; one light and two switches wiring. Here one lamp is controlled by two switches from two different positions. That is to operate the load from separate positions such as above or below the staircase, from inside or outside of a room, or as a two-way bed switch, etc.

3. Teaching method-own video lecture.

4. Proof of the activity: <https://youtu.be/W2h51ZR2j6A> -Video in English

: <https://youtu.be/k5Ln3KjPaqQ> -Video in Tamil

5. Feedback from student and knowledge gained: students have a very good opinion about the video and they expressed that they obtained real practical knowledge in a simple and easy manner.

6. Outcome of the Activity: The connection and working of staircase wiring is taught learnt and experienced in an abrupt way.
